DETAILED ACTION

This office action is responsive to amendment filed on 09/28/2005.

Response to Amendment

The examiner has acknowledged Applicant's arguments.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George N. Chaclas on 12/23/05.

The application has been amended as follows: Please cancel claim 23, and insert it in claims 21 and 30 as described below:

Delete “ and “ (claims 21 and 30, line 7; claim 24, line 19).

In claims 21, 30, line 8 and claim 24, line 20 after recipients, please insert “ and wherein the setting is selected from a group consisting of transmitting the message only to destinations identified in the prescribed area; transmitting the message to destinations identified in the prescribed area plus any additional destinations associated with the attributes; and transmitting the message only to the additional destinations associated with the attributes.

Allowable Subject Matter

Claims 21 - 22, and 24 – 34 are allowed.

The following is an examiner's statement of reasons for allowance: As specifically claimed the art of record fail to teach, among other limitations, in combination, the steps of selecting attributes and a setting for association with the body of the message, the attributes and the setting for automatically determining a list of recipients of the message according to the registrant data in the prescribed area; sending the message to the list of recipients; and wherein the setting is selected from a group consisting of transmitting the message only to destinations identified in the prescribed area; transmitting the message to destinations identified in the prescribed area plus any additional destinations associated with the attributes; and transmitting the message only to the additional destinations associated with the attributes (claims 21 and 30).

Also, the art of record fail to teach among other limitations, in combination, a server comprising a processor, which is operative to detect destinations in a prescribed region of the electronic mail message; classify the plurality of registrants into a first group associated with the group name and a second group not associated with the group name; determine a list of recipients for the electronic mail message according to a rule associated with the setting, the rule being for determining whether the first and second groups receive the electronic mail message; transmitting the electronic mail message to the list of recipients; and wherein the setting is selected from a group consisting of transmitting the message only to destinations identified in the prescribed

area; transmitting the message to destinations identified in the prescribed area plus any additional destinations associated with the attributes; and transmitting the message only to the additional destinations associated with the attributes (claim 24).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
